Bond Index: does the judgment survive the swap?

multi-rank tensors: party × time × action × coalition

V4 claim machine-checked: Lean 4 + Mathlib (formal/HohfeldV4.lean)

s and r^2 commute → V4 (Klein four-group, order 4) — measured

*full D4 (order 8) posited, now tested: a 09/26 hunt in a small LM
found no quarter-turn (non-abelian signature absent). V4 stands.*
